

Diagnosztikai frissítés WOW! 5.00.12

Az új 5.00.12 diagnosztikai frissítés 30 gyártó 265 modelljénél tartalmaz újdonságokat és újonnan kifejlesztett funkciókat!

Ez azt jelenti, hogy a WOW! adatbázis 66 gyártóból álló adatállományának a felénél történt fejlesztés és új funkciók bevezetése. Az új 5.00.12 frissítés már 1.084 modellnél kínál diagnosztikai lehetőséget.

A 2015-ös modellév 26 gyártó 148 modelljénél elérhető, míg a 2016-os modellévnél már 2 gyártó 19 különböző modelljét vizsgálhatjuk. Abból a tényből kiindulva, hogy a szervizekben nem csak a legfiatalabb gépjárművek kerülnek karbantartásra, folyamatosan bővítjük az idősebb modellek számát és adatbázisát. Az 5.00.12 frissítés legrégebbi modellje az 1994-es évjáratú Renault Laguna I.

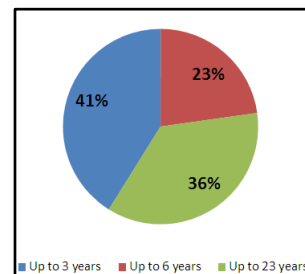

A frissítés 41%-a a max.3 éves, 23%-a a max.6 éves, 36%-a pedig az ennél idősebb modellekhez kapcsolódik.

Néhány további információ az 5.00.12 frissítésről: Jelentős fejlesztés a BMW és a Mercedes márkáknál a vezető segítő rendszereknél. Speciális funkciók mint például a kamera kódolás már a Ford Focus és Ford C-Max modelleknél is elérhető.

Az utasbiztonság magas prioritásának köszönhetően, a vezető asszisztens rendszerek és a TPMS menedzsment rendszerek fejlesztésére szintén nagy hangsúlyt fektettünk.

Példák:

• Audi	TT [07-]	Gumi nyomás ellenőrző rendszer
• Fiat	Ducato [06-]	Gumi nyomás ellenőrző rendszer
• Škoda	Superb II	Gumi nyomás ellenőrző rendszer
• Hyundai	i20 [15-]	Kamera kalibrálás
• Mazda	Mazda2 [14-]	Első érzékelő kamera
• Mercedes	C-Class [W204]	Multifunkciós kamera kalibrálás
• Nissan	X-Trail T32 [14-]	Sáv kamera beállítás
• Citroën	C4 Cactus	Akkumulátor visszahelyezés
• Nissan	X-Trail T32 [14-]	Akkumulátor visszahelyezés
• BMW	4-series [F32/33/36/82/83]	Részecskeszűrő regenerálás
• Opel	Agila B	Részecskeszűrő regenerálás
